

GWANGYANG FEZ

<http://www.gfez.go.kr/eng/index.do>

The Gwangyang Bay Area is located on the Pacific Ocean's main sea route. Based on this geographical advantage, the area provides business-friendly infrastructure with plentiful supplies of water and electricity. Centering on five districts themed on logistics, manufacturing, housing, tourism and other functions, the GFEZ aims to become an international trade city where new industries and cultural tourism harmonize.

Convenience of procuring raw materials and ease of setting up a value chain in connection with the nearby industrial complexes:

- POSCO Gwangyang Steel Mill and Yeosu National Petrochemical Industrial Complex.
- Forward industries of steel and oil materials, energy, and national R&D (testbed) projects.

INCHEON FEZ

<http://www.ifez.go.kr/eng/index>

Incheon is turning itself into the business hub of Northeast Asia. The city has a well-established transportation network including Incheon International Airport -- which was ranked first in airport service quality by the Airports Council for 10 consecutive years -- Incheon port and the international business complex. Boasting a highly effective business environment, the IFEZ offers almost everything from logistics and medical services to education and cutting-edge industries.

YES FEZ – Yellow Sea Region

<http://fez.go.kr/global/en/area/yesfez.do>

High-tech Industrial Cluster in the Yellow Sea Region.

The YESFEZ is close to Pyeongtaek port, a Northeast Asian logistics hub, which is directly connected to major ports in China. The area is being developed as a forward base for exports to China and a knowledge-creating special zone. It has an advanced technology-based industrial cluster that is home to 3,350 global companies and automobile-related firm.
